

AMENDMENTS TO THE CLAIMS

1. (Currently amended) A container, ~~comprising; consisting of~~
~~_____~~ a container body and a lid connected to it, the container body and lid being manufactured separately; ~~characterised by~~
~~_____ the fact that the container body (10) havings~~ a recess (16) or projection in or on its outer wall (14) adjacent to its dispensing aperture; ~~(12) and~~
~~_____ the lid (20) havings~~ a connecting land (24) extending outwards from its peripheral rim (21), with a projection (27) or recess provided at the end (26) of the land distal from the lid, which can be brought into engagement with the recess (16) or the projection on the container body (10).
2. (Currently amended) The container as claimed in Claim 1, ~~characterised by wherein the fact that the recess (16) and the projection (27) are shaped such that the projection (27) engages (28) firmly in the recess (16).~~
3. (Currently amended) The container as claimed in either of Claims 1 or 2, ~~characterised by the fact that wherein the end (26) of the connecting land (24) distal from the lid (20) is designed such that, in the assembled state, said end lies substantially flat against the outer wall (14) of the container body (10).~~
4. (Currently amended) The container as claimed in any of the ~~preceding claims 1, characterised by the fact that wherein the container body (10) is formed substantially cylindrical and the lid (20) substantially round.~~
5. (Currently amended) The container as claimed in any of the ~~preceding claim_s 1, characterised by the fact that wherein a~~

hinged connection (25) is provided in the region of the connecting land (24) of the lid (20).

6. (Currently amended) The container as claimed in ~~any of the preceding claim_s~~, ~~characterised by the fact that~~wherein the container body (10) and/or the lid (20) consist substantially completely of plastics material.
7. (Currently amended) The container as claimed in ~~Claim 6~~, ~~characterised by the fact that~~wherein the container body (10) consists of a different plastics material from the lid (20).
8. (Currently amended) The container as claimed in ~~either of Claims 6 or 7~~, ~~characterised by the fact that~~wherein the container body (10) and/or the lid (20) are produced by injection moulding.
